5500 Series Thin Clients for VDI

Value Class

The 5500 Series Thin Clients offer the smallest, lowest in cost and best value for money on the market. Designed for task or application orientated environments, these type of Thin Clients are the ideal desktop replacement solution for businesses looking to downsize their infrastructure, reducing management and power costs whilst still achieving exceptional performance and flexibility. The small factor means small energy consumption, as the 5500 Series only consumes 8 watts, is silent and creates very little heat.

These Thin Clients offer exceptional features and benefits without compromising the users precious desktop workspace. The 5500 range comes with a removable stand and an optional VESA mounting bracket allowing the unit to be mounted on the back of the monitor, on a wall or in a cabinet if required, to maximize on space-saving.This fully functional Thin Client is designed for a desktop virtualized environment and allows the user to connect to a variety of servers and virtual desktops.

The Linux Thin Client supports three modes of operation; Desktop Mode, WBT Mode and Kiosk Mode.
